Note: You will receive a quiz grade based on the completion and correctness of these Study Island modules.

You must complete at least 22 of the 25 Sections which begin on Tuesday, April 21st. If you do, you will earn half of the available points on the quiz. The other half of your quiz grade will be computed based on percentage correct for each section. Half of this percentage will account for the other half of your grade. For example, if you complete 22 of the modules, and you average a 60%, your quiz grade will be an 80%.

Completing more than required, including completing any or all of the five modules listed before Tuesday, April 21st, will result in extra credit.

Though I strongly suggest you use this schedule as a pacing guide, **all work is due by Friday, May 8th, without exception.**
